

Industrial heating

Over 30 years of thermal engineered solutions

Thermon
South Africa (Pty) Ltd.

*Design & fabrication of oil skid
for Petrochemical industry.*

Thermon SA

Industrial Heating

Thermon South Africa (Pty) Ltd is a South African based engineering solutions provider serving a variety of industries including Petrochemical, Power Generation, Mining, Manufacturing, Food and Beverage.

ELECTRICAL HEATING is our main area of expertise. We specialise in:

- Repair & refurbishment of flanged heaters
- Design, supply & installation of electrical heat tracing & steam tracing
- Hopper heating
- Drum & container heating
- Manufacture of heating elements & temperature sensors
- Design & manufacture of control systems

We offer **COMPLETE HEATING SOLUTIONS** from feasibility to installation. Heating systems can be Ex & ASME compliant.

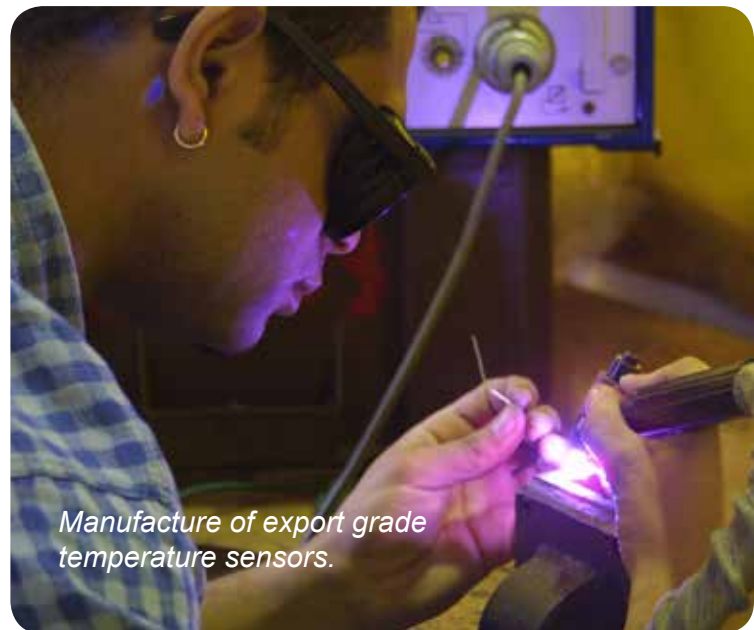

Our services also include design, engineering, technical support and training.

The company has participated in major projects in the Petrochemical and Oil industries in Southern Africa.

*Flanged heaters to be used in
high pressure, hazardous
environment.*

*Manufacture of export grade
temperature sensors.*

Installation of electrical heat tracing cable, Medupi Power Station.

Installing hopper heaters to maintain dry, free-flowing ash on electrostatic precipitators & baghouses.

Infrared heating in Textile industry.

Client training on-site.
